U. S. Steel Are Larger****Number of Shares in Brokers'
Hands Showed Decrease at
End of September**

Investment holdings of United States Steel common are increasing according to figures made public yesterday for the quarter ended September 30. These holdings on that date totalled 2,972,511 shares, contrasted with 2,920,860 shares on June 30 and 2,132,589 shares on December 31, 1918. Common stock of the corporation held in brokerage offices at the end of the quarter amounted to 2,110,514 shares, against 2,162,165 at the end of the second quarter. Brokers' holdings of preferred stock also showed a decrease in the third quarter, falling from 325,846 shares to 316,235 shares.

Foreign holdings of Steel common at the end of the third quarter constituted the lowest recorded during early days of the corporation's history. This claim from 465,174 shares on June 30 to 334,543 shares, or 7.76 per cent of the entire issue, on September 30. These figures, it is believed in financial circles, indicate that considerable foreign-owned stock has been liquidated since the armistice.

The decline in general foreign holdings is chiefly attributable to sales from Holland, which now holds 145,858 shares of Steel common, against 210,525 shares three months ago and 356,943 shares on June 30, 1918, just before the war.

Ask Legislation for**Rail Equipment Trust**

WASHINGTON, Oct. 27.—Congress was asked today by the railroad administration to enact legislation legalizing a plan by which New York bankers would create an equipment in trust to enable the railroads to reimburse the government for locomotives and freight cars bought by the United States and allocated to the carriers during Federal control. The plan is understood to provide for payment of the equipment on a fifteen-year install-
